Professional Experience

2025 - Present: Fullstack Developer and DevOps at Intricom Resources, remote

Fullstack development of the mobile app and backoffice for the Servicio de Sanciones Móviles Intricom (SSMI) for police forces in several autonomous communities (Balearic Islands, Murcia, and Galicia). Also development of the company's online attendance control application, in mobile, web, and backoffice variants.Technologies: react, expo, helm, material-ui, nestjs, hasura, graphql, nodejs, docker, react testing library, deck.gl, WSL

2024 - 2025: Frontend Developer and DevOps at Grupo MasMovil, remote

Development of the customer service management area (ecare) for the MasOrange group companies (másmovil, yoigo, jazztel, etc.). Also collaborating on deployment tasks and environment management for the same. Technologies: react, context, nx monorepo, kubernetes, helm, material-ui

2022 - 2024: DevOps and Frontend Developer at Ericsson, remote

In this position, I performed microservices migration tasks to Docker and Kubernetes platforms, migrating part of the company's infrastructure to Google Cloud Platform / bare metal to improve the deployment of 5G networks internationally.Technologies: kubernetes, helm, docker,

jenkins, google cloud console, and internal tools, react js, nodejs, jest, react testing library, scss, tailwind, sonarqube, fetch API, spinnaker, jira

2019 - 2021: R&D Frontend Developer at Kenmei Technologies, Paterna, Valencia

We developed a data visualization tool for telecommunications, using react, redux and deck.gl. Our main clients were Vodafone, Swisscom, Orange, O2, and masmovil. My main mission was to design, write and test the UI/UX of the software. Additionally, I also applied my Python knowledge in the backend with Django.Technologies: react js, nodejs, jest, scss, sonarqube, fetch API, google cloud console, docker, kubernetes, scrum master, jira, ansible, django, postman

2016-2019: Project Leader at Lexcontrol, Alcázar de San Juan, C.R

Lead programmer and scrum master for the compliance management system for lexcontrol.es. We were a team of three developers, where I wrote 85% of the frontend code and was responsible for support and the necessary system administration tasks for the job.Technologies: react js, jest, scss, blueprintjs, jira, fetch API, deck.gl, scrum master, firebase, postman, nodejs

2016 - 2019: Systems Administrator, Odoo Implementation, Grupo Criptana, s.l. Alcázar de San Juan, C.R

Implementation of the Open Source ERP Odoo using Python and system administration tasks, email systems, databases, file sharing, corporate website, etc. I also developed the construction management application in React, with backend on Google Cloud Platform and React and React Native as frontend.Technologies: Odoo, python, react js, scss, axios, scrum master, postman, nodejs, Ubuntu server, apache, php, mysql, firebase, samba, GCP, microsoft remote server, mikrotik routers, vpn

2014 - 2017: Web Designer and Systems Administrator, self-employed, remote

As a freelancer, during these years, I performed full stack development as well as system administration for the companies Roen Visual s.l., Molino Creativo, c.b and creátikos, c.b. from Alcázar de San Juan and Campo de Criptana, as well as experiments with augmented reality and geolocation applications.Technologies: Wordpress, react js, nodejs, unity (C#), css, scss, django, react native, jquery, bootstrap, Ubuntu server, apache, php, mysql

2008-2012: Web Designer and Systems Administrator, TI53, S.L., remote

As a freelancer, during these years, I performed system administration tasks for the company TI53, s.l., managing the technological part of the day-to-day operations of the company.Technologies: Windows server, Ubuntu server, apache, php, mysql, samba, prevengos, microsoft remote server, mikrotik routers, vpn, Apple server administration tools
